

Import information from PO PDFs

```
%files in question are the ones in this folder
clear
files = dir;
```

Focus only on PO PDFs

```
%this block of code make sure we're only focusing on the PO pdfs
elim = [];
foldr = [];
for i = 1:length(files)
    if files(i).name(1) == '.'
        elim = [elim i];
    elseif (contains(files(i).name, '.pdf') == 0)
        elim = [elim i];
    elseif isdir(strcat(pwd,files(i).name)) == 1
        elim = [elim i];
    elseif files(i).bytes == 0
        elim = [elim i];
    elseif strcmp(files(i).name,'outfile.BbB')
        elim = [elim i];
    end
end
files(elim) = [];
```

Step through files and pull out PO information

```
%allPOinfo = [];
for f = 1:length(files)

    allPOinfo = [allPOinfo; ExtractImportantInfo(files(f).name, allPOinfo)];
    [height, width] = size(allPOinfo);
    if contains(allPOinfo(height, 1), "000")
        allPOinfo(height, :) = [];
    end
end

save allPOinfo allPOinfo
```
